New for 2015 is the Tech Vest® Lite.

This unisex product incorporates a high visibility Australian/New Zealand standards compliant safety vest and light duty tool belt. The Tech Vest® Lite was designed to meet the needs of those users that are required to carry small tools and equipment on the job site whilst wearing a safety vest at the same time.

Tech Vest® Lite

Small utility pouches

Radio pouch

Notebook pouch

Multi-placement

Tool holsters

Available in two different high visibility colours and sizes from Small to XL, the Tech Vest® Lite is also fitted with a removable waist pad to further add comfort to the wearer.

The Tech Vest® Lite also allows the user to individually configure the vest utilizing the modular equipment pouches.

Specially designed modular equipment pouches are easily repositioned on the chest or waist of the vest using a single or dual locking strap. Tech Vest® Lite pouches are currently available for the following items:

- Notebook pouch (with internal pen holders)
- Small torch or pliers pouch
- Cutting snips holster
- Adjustable spanner/screw driver holster
- Radio communication pouch

The design of the Tech Vest® Lite has also allowed for handy microphone and cable straps on the rear and topside of the vest. This feature allows the operator to easily monitor communication traffic in the noisiest of operating environments.
