Personal load carrying solutions
for the mining industry

User information

Tech Vest™ load carrying harness

Constructed from a heavy duty knitted mesh and abrasive resistant Cordura® nylon, the Tech Vest is fully adjustable to provide a comfortable fit for the modern underground worker.

The materials used in the Tech Vest provides a comfortable load carrying harness which “breathes” through the use of the knitted mesh. Moisture absorption of the padding is reduced by utilizing quality, moisture resistant, high density foam.

Underground visibility is increased through the incorporation of 3M Scotchlite™ reflective panels on the Tech Vest.

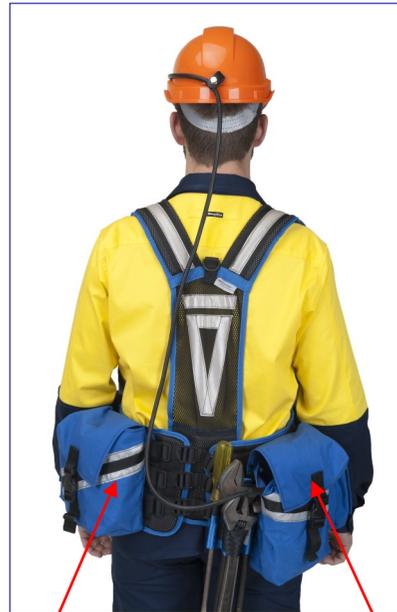

Adjusting the Tech Vest

Initial waist adjustments can be made by using the main straps at the rear of the vest.

Further quick adjustments can be easily made by using the two main waist straps at the front of the vest.

The quick adjustment straps at the front of the Tech Vest allow for additional clothing that may be required to be worn.

Each shoulder pad can be adjusted to allow the Tech Vest to sit evenly around the waist.

Self Rescuer Pouch

Battery Pouch

Small tools are kept in place with specially designed pouches on the battery and self rescuer pouches

Remember to buckle up all pouches

Safety glasses, tools or instruments will fit into the front pouches.
