

The original innovator since 2001

The Tech Vest has been used extensively in the Underground Coal Mining industry throughout New South Wales and Queensland since 2001.

Designed to replace the traditional mining belt the Tech Vest evenly distributes the carried load over the upper body and not just the waist and hips.

Benefits

- Safety:** Increased personnel visibility underground using 3M™ reflective materials*
- Comfort:** Even weight distribution over the upper body
- Durable:** Using Cordura™ abrasion resistant materials, the Tech Vest is lightweight yet tough enough to handle underground conditions
- Available:** A range of standard and custom made sizes
- Rewarded:** Recognized over ten years ago by the NSW Department of Minerals and Resources as an industry innovation

* Exceeds ANS/NZS 1906.4:1997 Class R requirements

Solutions

Designed and manufactured in Australia using local and external components, the Tech Vest has been designed to hold and carry the necessary underground equipment. Cap lamp battery, self rescuer unit, small tools, glasses and gloves are all catered for.

Fully adjustable at the waist and shoulders ensuring the best fit, the Tech Vest is available in a range of colours and materials to suit different applications.

The Tech Vest is the most comfortable and versatile underground equipment harness on the market today.

Improving personal visibility and comfort underground
